Subject: MEDICAL REPORT

Dr MBOUM Alphonse
Médecin

I, the undersigned,..... Medical Director of Mamfe District Hospital testify that Ms. NDIP OTUN ETTA born on 11/06/1995 at Mamfe consulted at the emergency unit of the above mention hospital on December 16, 2017 at 9:22am with complaint of alleged assault:

- The patient reports having been subjected to non-consensual sexual intercourse and physical assault by two military men on December 15, 2017 in Mamfe.
- She was forcibly restrained and penetrated vaginally/rectally/orally without consent. Physical violence included blows, strangulation, restraints. The patient reports fear for life and inability to resist due to threats, weapons, overpowering force
- Physical Examination Findings: Evidence of genital trauma: erythema, lacerations, ecchymosis.
- Non-genital injuries: contusions to upper arms, abrasions on thighs, neck bruising.
- Signs of acute distress: tearfulness, tremor, avoidance of eye contact.
- Psychological / Psychiatric Sequelae: Symptoms consistent with acute stress reaction and post-traumatic stress disorder (PTSD): nightmares, hypervigilance, intrusive recollections, insomnia, startle response, emotional numbing.
- Possible depressive symptoms: hopelessness, social withdrawal, poor appetite, anhedonia.
- Assessment / Impression: The patient's account is clinically plausible and consistent with documented injuries.
- The patient was given some antibiotics and pain reliver for five days, although specific medications were offered to her during the SAMFE, demographic and assault characteristics were associated with medication acceptability.

Recommendation: Given the physical and psychological evidence of sexual violence and resulting trauma, the patient may face risk of re-traumatization or persecution if returned to their country of origin.

This medical report is hereby issued to serve the purpose it is intended for.

THE DIRECTOR

Dr. MBOUM ALPHONSE
(Medical Doctor).
